

Musician First

[Contact](#)

Select from these four general categories.
This is just to get a broad idea of what you are going for.

Edgy

Is your music dangerous, sharp, and always standing out from the pack? Do you try to make a bold statement, and love to hear loud, exciting sounds? Rebels take heed, this is where rock, punk, metal, and the heavier side of music is found.

Chill

If radio was still the most popular place to listen to music, this is where you would want your beautiful, vocal driven, emotion based music to soar and be found. Chill music can be found in genres such as folk, jazz, singer-songwriter, and many, many more.

Dance Driven

This is self explanatory, but when your main goal in life is to get people to storm the dance floor and live their fantasy, then this your vibe. Tons of styles of music can be found here, such as electronic pop, RnB, Drum n Bass, Trap, and more.

Far out

Rules in music? Pfft, as if. Genre is just a 5 letter word, and you desire to make something that really challenges the listener, whether it's a 25 minute spoken word poem played on a midi saxophone, or something that you cooked up in that basement laboratory of yours.
